

PROFESSIONAL SUMMARY

Programme and project analyst supporting **UNDP-, GEF- and GCF-funded** technical cooperation across biodiversity, climate change and ecosystem restoration in Asia-Pacific. Combines project coordination, monitoring and evaluation, and multi-stakeholder engagement with hands-on analytical capability — geospatial analysis, GHG accounting, and the design of digital monitoring and portfolio-analytics tools used across multi-country programmes. Experienced in translating technical and policy information into reports, briefings and decision-support tools for donors and senior management, with strong command of **GEF/GCF project cycles** and knowledge-management platforms.

CORE COMPETENCIES

Programme & Project Management | Monitoring, Evaluation & Learning | Environmental Technical Analysis | Knowledge Management | Stakeholder Engagement | Digital Innovation | Geospatial Analysis

Tools & Software: ArcGIS | QGIS | Google Earth Engine | FAO EX-ACT | Excel | Python, C (basic)

PROFESSIONAL EXPERIENCE

United Nations Development Programme (UNDP), Bangkok, Thailand
Nature, Climate and Energy Team Fellow

Oct 2025 – Sep 2026

Project Design, Coordination & Stakeholder Engagement

- Supported the design of GEF projects, including a Nature-based Solutions and Blue Carbon project in Viet Nam through its PPG cycle (GHG calculations, climate-risk screening, knowledge-management strategy and responses to GEF Secretariat comments) and a peatland restoration project in China
- Coordinated day-to-day implementation and tracked progress for the GEF-funded Ecosystem Restoration Integrated Programme (ERIP) in Cambodia, liaising with the country office on milestones and reporting
- Supported Nature4Health (N4H) in Bhutan from scoping to start-up, contributing to the scoping report and the Implementation Project Document (IPD), coordinating the kick-off workshop and drafting the biannual report
- Coordinated the Business & Biodiversity side event “*Reimagining Human-Nature Relationships in Asia and the Pacific*” with the UK Embassy and the ESCAP Secretariat, covering panel and speaker coordination, communications and a full procurement cycle delivered within a **three-day timeline**
- Supported the regional Business & Biodiversity Initiative by drafting its video script, reviewing consultant deliverables, engaging prospective partners and consolidating a podcast episode with a Malaysia-based expert
- Facilitated stakeholder engagement and interviews with senior government officials, ambassadors and representatives of multilateral organisations, producing communication materials to promote regional biodiversity partnerships
- Prepared monthly progress summaries and management updates for supervisors and senior management, tracking implementation milestones across the portfolio

Monitoring, Evaluation & Programme Performance

- Reviewed **Project Implementation Reports (PIRs) for four GEF projects** — C-PAR5 and a forest restoration and soil-erosion project in China, ERIP in Cambodia and ENUA in the Cook Islands — assessing implementation progress, risk ratings and supporting evidence
- Consolidated GEF and co-financing data across six Asia-Pacific tiger range countries to support TCC funding tracking
- Built a combined GEF/GCF portfolio workbook for **Papua New Guinea** covering 11 UNDP/UNIDO projects and 25 sites, cross-referencing project documents to verify site designations, areas and coordinates

Greenhouse Gas Accounting & Technical Analysis

- Carried out **GHG accounting with FAO EX-ACT** across the project cycle: at design stage for a GBFF-funded river-buffer project in Vanuatu, at mid-term review for the Global Wildlife Program (GWP) in Malaysia, and at terminal evaluation for the East Asian–Australasian Flyway (EAAF) project in China
- Identified relevant METT indicators to inform a forest-degradation baseline for protected-area sites in Malaysia as part of the GWP mid-term review
- Developed climate-risk screening integrating hazard, exposure, vulnerability and resilience analysis into ecosystem-restoration and blue-carbon project design

Knowledge Management, Communications & Policy Support

- Led the **Cambodia Nature Pledge Country Profile** and supported profiles for Malaysia, Mongolia and India; coordinated consultants and communications colleagues to consolidate the eight-country regional Nature Pledge publication, aligned with the Kunming-Montreal Global Biodiversity Framework
- For **UNCCD COP17**, co-authored UNDP's regional brochure *Restoring Land, Restoring Hope in Asia and the Pacific* and prepared the SGP Rangelands & Pastoralism Briefing Note, identifying 2,094 related grants worth USD 65.9 million across 121 countries; now preparing a regional key-message brochure for pre-COP31
- Contributed knowledge products to PANORAMA Solutions, WOCAT and Biodiversity Exposure, alongside UNDP blog articles and regional communication materials on ecosystem restoration and Nature-based Solutions
- Produced formal minutes and speaker documentation for a regional webinar introducing biodiversity credits to UNDP RBAP environment focal points

Geospatial Analysis, Data Systems & Digital Tools

- Contributed to an interactive web-based GIS platform for **Indonesia's GEF portfolio**, mapping **11 projects, 63 sites and 24 provinces** against biodiversity, climate and Nature Pledge priorities to support portfolio analysis
- Developed, with the GCF team, a digital livelihood-monitoring tool for a **GCF programme in Uganda**, tracking group formation, training and asset distribution across five value chains — covering **888 groups, 17,758 households and 74,584 beneficiaries**
- Helped build an automated method to extract and classify more than **30,000 Small Grants Programme (SGP) projects** worldwide, identifying pastoralism- and rangeland-related grants for global COP17 analysis

United Nations ESCAP (UNESCAP), Incheon, Republic of Korea **Environmental Affairs Intern**

Jul 2024 – Jan 2025

Environmental Analysis & Policy Support

- Conducted regional assessments of land degradation and desertification using multi-source datasets and spatial analysis, identifying land-use trends, degradation patterns and environmental risk hotspots
- Integrated environmental and socio-economic datasets to support policy analysis on sustainable land management and regional environmental cooperation
- Contributed to the preparation of *A Brief Overview of Desertification and Land Degradation in North-East Asia*, synthesising regional evidence and policy developments for UNESCAP

Reporting, Knowledge Management & Regional Coordination

- Developed analytical reports, thematic maps and visual products to support regional environmental policy dialogue and knowledge sharing
- Translated technical findings into accessible summaries, presentations and briefing materials for policymakers and stakeholders
- Supported the organisation of regional workshops, webinars and expert meetings by coordinating logistics, preparing meeting documentation and consolidating discussion outcomes
- Assisted in the preparation of conference materials, background documents and presentation content for regional environmental meetings, facilitating knowledge exchange among Member States and development partners

Guangxi Natural Resources Ecological Restoration Center, China **Research Assistant**

Aug 2022 – Oct 2024

Ecological Restoration Planning & Environmental Assessment

- Conducted spatial analyses of land-use change, vegetation dynamics, soil conditions and ecological degradation to identify priority areas for ecological restoration and sustainable land management
- Integrated multi-source environmental datasets, including land cover, vegetation, soil and climate information, to assess ecosystem conditions, degradation drivers and restoration potential
- Applied ecological and climate-related indicators to evaluate ecosystem resilience, environmental risks and restoration suitability, supporting evidence-based restoration planning

Policy Research & Technical Reporting

- Reviewed national policies, technical guidelines and scientific literature on ecological restoration, land degradation and territorial spatial planning to support project implementation
- Contributed to ecological restoration plans, technical reports and planning documents by synthesising scientific evidence into policy-relevant recommendations
- Developed thematic maps, analytical figures and technical summaries to communicate restoration priorities and environmental assessment results for government agencies and project teams

Knowledge Management & Stakeholder Support

- Collaborated with multidisciplinary researchers and technical experts to support restoration planning, data analysis and project delivery
- Prepared communication materials and technical documentation to facilitate stakeholder engagement and knowledge sharing on ecological restoration and sustainable land management

Shanghai Jingwei Planning and Design Research Institute, China

Jul 2021 – Feb 2022

Research Assistant

Field Research, Stakeholder Engagement & Government Reporting

- Conducted field surveys and stakeholder consultations to inform a county-level Education Sector Master Plan for Gucheng County, Xiangyang, Hubei Province
- Coordinated cross-agency data collaboration with the local Education Bureau and Statistics Bureau, consolidating enrollment and demographic datasets to underpin planning analysis
- Prepared planning deliverables and presented findings to government, supporting formal submission and approval

Ecological Restoration Research Lab, Wuhan University of Technology

Sep 2020 – Jun 2021

Research Assistant

Ecological Restoration Planning & Spatial Zoning

- Contributed to ecological restoration planning for Gar County, Tibet Autonomous Region, covering restoration objectives, spatial zoning and implementation measures
- Delineated ecological protection red lines through spatial analysis to guide conservation priorities and land-use zoning
- Authored the formal plan text, consolidating field assessments and restoration strategy into a technical document

EDUCATION AND TRAININGS

Wuhan University — Wuhan, China

Sep 2022 – Jun 2025

Master of Management in Land Resource Management

Outstanding Graduate Representative | National Scholarship for International Talent Development

Wuhan University of Technology — Wuhan, China

Sep 2018 – Jun 2022

Bachelor of Science in Human Geography and Urban-Rural Planning

Outstanding Graduate | National Scholarship

Professional Trainings & Certifications

- *Introduction to Ecosystem Restoration* (Ecosystem Restoration, Part 1) — UNDP Learning for Nature **Apr 2026**
- *Gender and Biodiversity Decision-Making* — UNDP Learning for Nature / GEF **Apr 2026**
- *Using EX-ACT to Estimate the Mitigation Potential of Agricultural Interventions* — FAO eLearning Academy **Dec 2025**
- *Women Shape Biodiversity Futures: Strengthening Regional Leadership Across South and South-East Asia on Target 23 and CBD Negotiations* — Women4Biodiversity, Bangkok **Nov 2025**
- *Women's Security Awareness Training (WSAT)* — UNDSS / UNFPA, Bangkok **Nov 2025**

PUBLICATIONS & KNOWLEDGE PRODUCTS

Peer-reviewed Publications

- Zhang, J., Hu, L., & Yang, K. (2025). Monitoring desertification in Ordos City using integrated vegetation and soil indicators. *Journal of Arid Environments*

Knowledge Products

- Kim, S., Hu, L., Wang, Q., & Zhang, D. (2024). A Brief Overview of Desertification and Land Degradation in North-East Asia. *UNESCAP*
- *People at the Heart of Nature: Community Stewardship Protecting Viet Nam's Biosphere Reserves and Biodiversity* (2025). PANORAMA — Solutions for a Healthy Planet. Contributor
- *Nature Pledge Country Profile: Cambodia* (2025). UNDP. Contributor
